

Dileep Krathu

Q) How can you reverse a string?

Ans

```
const string = "Hello"  
let stringReverse = string.split("").reverse().join("")  
console.log(stringReverse).
```

Setion - B

Q,

1) Array is a collection of element that store in a single variable.

eg: Array = [1, 2, 3, 4, 5, 6]

2) Debugging is the process of finding error in our code, its related to our testing. Testing is to find errors, bugs in our code. Testing check the application works correctly.
eg: ~~check~~ console.log()

Section - C

1) let n = 10

let num = 14

```
for (let i = 1; i <= n; i++) {
```

```
  console.log(num);
```

```
  num = (i % 2) ? num * 2 : num - 8;
```

```
}
```

Section - D

2) ~~SELECT DISTINCT~~

~~manager_id~~

~~FROM employees~~

~~WHERE manager_id IS NOT NULL;~~

Section - E

1) JS is object it used to store data value in key value pairs

JS is stands for Javascript object notation.

2) {
 "id": 1,
 "name": "Dileep",
 "course": "BCA"

a
course: "BCA"
course: "BCA"
course: "BCA"

JULL)

a

3) let Student = [{ id: 1, name: "Dileep", course: "BCA" },
{ id: 2, name: "Anyana", course: "BCA" },
{ id: 3, name: "Rahul", course: "BCA" }];

Section - D

1) ~~SELECT~~ SELECT *

FROM employee
WHERE salary > 3000;

2) SELECT DISTINCT
manager_id

FROM employee
WHERE manager_id is NOT NULL;
